

EDUCATION

Massachusetts Institute of Technology - Woods Hole Oceanographic Institution,
Cambridge/Woods Hole, Massachusetts, USA

Ph.D., Biological Oceanography

2011–2016

- Thesis: [Productivity, Metabolism and Physiology of Free-Living Chemoautotrophic *Epsilonproteobacteria*](#)
- Advisor: Dr. Stefan M. Sievert

Mount Allison University, Sackville, New Brunswick, Canada

Bachelor of Science, First Class Honours with Distinction, Biology

2003–2008

- Honours Thesis: Endophytic Fungi of Liverworts (*Bryophyta*) in a Copper-Contaminated Environment
- Advisors: Dr. Felix J. Bärlocher and Dr. Robert Thompson
- Minor in Chinese Studies

PROFESSIONAL EXPERIENCE

University of Southern California, Fuhrman Lab; Los Angeles, CA, USA

Postdoctoral Scholar - Research Associate

January 2018 - present

- Compiling an atlas of microbial biogeography based on existing meta-'omics datasets and newly generated amplicon sequence libraries
- Developing software pipelines for the analysis of amplicon sequences, intercomparison with metagenomes, and *in-silico* evaluation of primer performance
- Working with other CBIOMES investigators to intercompare microbial abundance data with trait-based models and statistically infer microbial interaction networks

Chinese University of Hong Kong, Luo Lab; Shatin, New Territories, HK

Research Assistant

November 2016 - Nov 2017

- Developed plate-based isolation methods for high-throughput isolation of fastidious chemoautotrophic *Campylobacteria*
- Isolated sulfur-oxidizing microorganisms from hydrothermal vents and coastal sediments for pangenome and population genetic analysis
- Developed a high-throughput isolation system for selective enrichment of roseobacter-group bacteria from local sediments

Woods Hole Oceanographic Institution, Sievert Lab; Woods Hole, MA, USA

Graduate Research Assistant

2011–2016

- Incubated deep-sea hydrothermal vent chemoautotrophic communities at *in situ* pressure and temperature to infer their ecophysiology and biogeochemical impact
- Cultivated *Sulfurimonas denitrificans* in a custom-built chemostat to validate a theoretical model of energy conservation for this organism

Guest Investigator

November 2016 - present

- Studying the population genetics of a collection of 9 *Sulfurovum* single-cell genomes sampled in 2008 and again in 2014 from the same deep-sea study site

- Studying activity and community changes for hydrothermal fluid incubations in collaboration with Stefan Dyksma and Marc Mußmann who developed a [novel method](#) that combines ^{14}C incubations and CARD-FISH/FACS to quantify activity

National Research Council of Canada; Halifax, NS, Canada

Technical Officer, National Bioproducts Program

2009-2011

- Cultivated and harvested kilogram quantities of microalgal biomass
- Developed protocols for lipid extraction from microalgae and GC-FID quantification
- Isolated pure cultures of microalgae from environmental samples

Environment Canada; Moncton, NB, Canada

Environmental Technician, Atlantic Lab for Environmental Testing

2009

- Conducted toxicology assays and counted sea urchin larvae microscopically

Atlantic Canada Conservation Data Center; Sackville, NB, Canada

Assistant Field Botanist

2008

- Identified native flora in the field, with an emphasis on rare species

Marine Macroecology and Biogeochemistry Lab; Sackville, NB, Canada

Summer Research Student

2007-2008

- Quantified iron accumulation in *Cyanobacteria* grown under high and low light under the supervision of Dr. Zoe Finkel

TEACHING
EXPERIENCE

Woods Hole Oceanographic Institution; Woods Hole, MA, USA

Graduate Teaching Assistant

Biological Oceanography (Spring 2015)

Instructors: Dr. Lauren Mullineaux and Dr. Stace Beaulieu

- Taught two classes on microbial biogeochemistry and metabolism
- Developed and marked assignments / exam questions; held weekly review sessions

Marine Microbiology and Biogeochemistry (Fall 2013)

Instructors: Dr. Stefan Sievert and Dr. Amy Apprill

- Taught class on coupling microbial identity to function
- Developed and marked assignments / exam questions; held weekly review sessions

Mount Allison University; Sackville, NB, Canada

Undergraduate Teaching Assistant, Native Flora (Fall 2007)

Instructor: Dr. Robert Thompson

- Assisted students to identify vascular plant species in the field

RESEARCH
MENTORING
EXPERIENCE

(Jun 2021 - present, USC): Mentoring postdoctoral scholar Yubin Raut in a project that aims to use bioinformatic data from global ocean basins to validate and improve with the global-scale biogeochemical model DARWIN.

(Dec 2019 - present, USC): Mentoring undergraduate Bruce Yanpui Chan in bioinformatic analyses and assisted with a successful funding application to the program Student Opportunities for Academic Research (SOAR).

(Jan 2018 - present, USC): Assisted graduate students Selene Sanchez-Garcia (Technical University Braunschweig) and Felix Milke (University of Oldenburg) with amplicon analysis, data interpretation, and [conference presentations](#).

(Jan 2018 - present, USC): Assisted Fuhrman lab graduate students in implementing a qiime2 workflow for the analysis of PCR amplicon data.

(May 2017 - May 2018, CUHK): Guided the final-year undergraduate project* of Annie Wing-Yi Lo, which tested the effect of microoxic conditions on the isolation of sulfur-oxidizing microbes from shallow-water hydrothermal vents and local sediments.
*Equivalent of Honours thesis.

(2015-2016, WHOI): Supervised the independent research project of volunteer Dali Smolsky to isolate novel autotrophic *Campylobacter* from salt marsh and hydrothermal vent environments.

(2010, NRC): Taught students techniques for lipid extraction and transesterification of microalgal biomass with bio-compatible solvents.

PEDAGOGICAL &
RESEARCH
TRAINING

edX Online Learning Platform

Becoming a More Equitable Educator: Mindsets and Practices (Spring 2021)

- Exploring mindsets and strategies used by effective educators to reflect on and address issues of educational equity in the classroom, with an emphasis on how race, ethnicity and other differences affect student outcomes.

CyVerse Learning Network

Foundational Open Science Skills Online (Spring 2021)

- Learned technical and pedagogical skills for collaborative data science projects using open-source cyberinfrastructure.

University of Southern California, Center for Excellence in Teaching

Future Faculty Teaching Institute (Spring 2020)

- Studied paradigms and practical approaches for instructional design in addition to strategies for providing online course offerings.

OTHER
EDUCATIONAL
EXPERIENCE

Marine and Environmental Biology Postdoc Outreach Program (USC) / Los Angeles Public Library (Dec 2020 - present)

- With 6 fellow postdocs, developing a 4-session curriculum for teaching concepts in marine science to elementary-age students.
- Responsible for teaching a session on microscopy using the [foldscope](#) (low-cost origami microscope) to visualize microalgae and learn about their role in food webs.
- Delivering sessions remotely through Los Angeles Public Library *Neighborhood Science* program, targeting learners historically underrepresented in STEM fields.

Chinese Summer Language Village, Mount Allison University (2008)

- Collaboratively developed and taught a language immersion camp for native English speakers ages 8-16 to learn Mandarin Chinese.

Planet Performers environmental drama, Mount Allison University (2007-2008)

- Taught and discussed environmental issues (biofuels, global warming) with students in grades 6-8, and created two public performances in collaboration with other undergraduate students.

PROFESSIONAL
SERVICE

Reviewer for: Scientific Reports, PLoS One, Frontiers in Microbiology, International Journal of Systematic and Evolutionary Microbiology, Journal of Open-Source Science, Nature Communications, PeerJ, Molecular Ecology Resources, Environmental Microbiology, ISME Journal, Journal of Geophysical Research - Biogeosciences.

PROFESSIONAL
AFFILIATIONS

American Society for Microbiology (ASM), Canadian Society for Microbiology (CSM), The Oceanography Society (TOS)

RESEARCH
CRUISES

November 2014, East Pacific Rise 9°N, R/V *Atlantis*: AT26-23, Chemoautotrophic

Carbon Production at Deep-Sea Hydrothermal Vents

January 2014, East Pacific Rise 9°N, R/V *Atlantis*: AT26-10, Dimensions of Biodiversity, An Integrated Study of Energy Metabolism, Carbon Fixation, and Colonization Mechanisms in Chemosynthetic Microbial Communities at Deep-Sea Vents

July-Aug 2012, Rhode Island Continental Shelf, R/V Endeavor: Deep Ocean Benthic Sampler Cruise

LABORATORY EXPERIENCE

Skills I am comfortable teaching / supervising:

- Aquatic microbial field sampling, preservation, and DNA extraction
- SSU rRNA amplicon / metagenomic / -transcriptomic library preparation
- Microbial pure culture isolation, including for oxygen-sensitive microorganisms
- Physiological growth experiments, including both batch and chemostat methods
- Incubations for measuring biogeochemical rates and microbial growth, including both stable/radioisotope methods
- Microscopic enumeration and identification of environmental microorganisms, including Fluorescence *In Situ* Hybridization methods (e.g. CARD-FISH) and subsequent single-cell activity measurements (e.g. NanoSIMS)

SOFTWARE COMPETENCIES

Scripting and Plotting Languages: Python, bash, R.

Selected Bioinformatics Software Experience: qiime2, jupyter, conda/mamba, snake-make, anvi'o, (meta)SPAdes, look@NanoSIMS, GTDB-tk, phyloFlash, bbtools.

LANGUAGES

Written Chinese (functional with traditional and simplified characters), Mandarin Chinese (conversational), Cantonese (basic spoken), French (conversational), Spanish (functional)
